

Shashank Shalabh

Full-Stack Developer

A seasoned Full Stack Developer with 15 months of practical experience adept in the design, development, and implementation of diverse applications and solutions across a spectrum of technologies and programming languages. Possessing an ardent desire to apply extensive development knowledge and hands-on technical skills, this professional seeks a dynamic role as a Full Stack Developer.

WORK EXPERIENCE

M2P Fintech (Aug 22 - Nov23)

Software Developer

- Syntizen an M2P Company, Hyderabad.

As an M2P Fintech professional at Syntizen, I have acquired hands-on expertise in fintech development across platforms such as Instant PAN, FRS, server management, and chatbot integration, employing a diverse tech stack. Proficient in HTML, CSS, JavaScript, Bootstrap, and ReactJS, I actively contribute to the development and enhancement of fintech solutions, emphasizing user-friendly design and robust functionality.

- **Development:**

Led backend API development, integrating a secure payment gateway, and optimizing data storage with MongoDB for Instant PAN. Implemented robust authentication, designed mapping features, and ensured API validation. Employed PostgreSQL for efficient data management in FRS and crafted a KYC workflow on Chat-bot. Implemented essential APIs, developed a user-friendly dashboard, managed server authorizations, and tracked user access rights. Enhanced web app performance and scalability using React.js.

- **Key Achievements:**

Spearheaded creation of a dynamic payment gateway in INSTANT-PAN, enabling transactions among superAdmin, admin, and user. Pioneered multi-tenant architecture in Node.js for scalability. Built a highly scalable application, implementing rigorous testing with Postman for reliability. This strategy optimized performance and enhanced growth potential and system resilience.

PROJECTS

- **Dot&Key-Clone**  

Cloned a captivating Beauty Products E-Commerce platform. Implemented essential functionalities, including a streamlined checkout process and intuitive 'Add to Cart' features for an enhanced user experience.

Features

Social Sign-in/Sign-up | User authentication | Sorting Items | Discount Coupon | Slide advertising | Sticky navbar

Tech Stack: HTML | CSS | JavaScript

Area of Responsibility

Built two product pages | Built product description page | Built search page | Built cart page

- **Myntra** 

Cloned Myntra website showcases adept use of advanced web development, particularly with React. It highlights expertise in crafting extensive online retail ecosystems.

Features

Social Sign-in/Sign-up | User authentication | Sorting Items | Discount Coupon | Slide advertising | Sticky navbar | payment gateway | add to cart

Tech Stack: ReactJs | CSS | JavaScript | ES6 | Firebase | MUI | Bootstrap

Area of Responsibility

Built home pages | Built mini navbar feature | Built two page of clothing | Built footer
